

Perfect. Since Step 1 and Step 2 are complete, we now move to the most important step.

This step determines whether visitors become customers.

STEP 3 - Website Content

Goal

Create the complete content for every page before designing or coding.

At the end of this step, you'll have all the text needed for the website.

What I Need From You for Step 4

Nothing.

Just reply **Next**.

In **Step 4**, we'll create a complete **UI/UX Design Specification** that defines the visual style, layout, spacing, colors, typography, components, animations, responsiveness, and interaction behavior. This design specification will make the HTML development in the next step straightforward and consistent.
