

Great. From now on, we'll stop thinking like document writers and start thinking like **product designers**.

This step defines exactly how the website should look before writing HTML.

STEP 4 - UI/UX Design Specification

Goal

Create a modern, premium, conversion-focused design that feels like a SaaS product rather than a company brochure.

Save as

04_UI_Design.md

1. Design Objectives

The website should make visitors feel:

- Professional
- Trustworthy
- AI-driven
- Modern
- Easy to understand
- Fast
- Premium

Visitors should understand **what Upswing Growth does within 5 seconds**.

2. Design Style

Style

Modern SaaS
Minimal
Clean
Professional
Lots of white space

Rounded corners
Soft shadows
Large typography

Avoid:

- Heavy gradients
- Busy backgrounds
- Too many colors
- Long paragraphs
- Generic stock-photo layouts

3. Color Palette

Primary

#2563EB

(Blue)

Buttons

Highlights

Links

Secondary

#0F172A

(Dark)

Headings

Footer

Accent

#14B8A6

Success

AI

Growth

Background

#FFFFFF

Light Background

#F8F AFC

Used for alternate sections.

Text

Heading

#111827

Paragraph

#4B5563

4. Typography

Heading Font

Manrope

Body

Inter

Weights

700

600

500

400

5. Layout

Maximum Width

1280px

Container

margin:auto
padding-left/right:24px

Section Spacing

120px

Mobile

64px

6. Button Style

Primary

Blue background

White text

Rounded

Shadow

Hover

Slight lift animation

Secondary

White

Blue border

Blue text

Hover fills blue

7. Hero Layout

Left

Content

Right

Product Screenshot

NOT stock photos.

8. Section Design

Each section should follow:

Small Label

Large Heading

Short Description

Cards/Grid

CTA

Never start directly with a paragraph.

9. Cards

Rounded

20px

Padding

32px

Hover

Move

-6px

Shadow increases

10. Icons

Use

Lucide Icons

Examples

Growth

Robot

Chart

Sparkles

Users

Target

Brain

Rocket

Message

Calendar

11. Features Grid

Desktop

3 Columns

Tablet

2 Columns

Mobile

1 Column

12. Industry Cards

Each card

Icon

Industry Name

One sentence

13. How It Works

Timeline

Desktop

Horizontal

Mobile

Vertical

14. FAQ

Accordion

Only one open

Smooth animation

15. Footer

Dark background

4 columns

Large CTA before footer

16. Animations

Keep them subtle.

Use:

- Fade in
- Slide up
- Count-up for statistics
- Hover elevation
- Smooth scrolling

Avoid:

- Auto-playing carousels
 - Flashing effects
 - Excessive motion
-

17. Mobile Design

Menu

Hamburger

Buttons

Full width

Cards

Single column

Hero image

Moves below content

18. Accessibility

- High contrast text

- Keyboard navigation
 - Visible focus states
 - Alt text for images
 - Semantic HTML
 - Large tap targets
-

19. Image Guidelines

Use:

- Product dashboard screenshots
- Custom AI-themed illustrations
- Simple vector graphics
- Industry-specific illustrations

Avoid:

- Generic office stock photos
 - Handshake images
 - Random business meetings
-

20. UI Component List

Your website will need these reusable components:

- Header
 - Navigation Bar
 - Hero Banner
 - CTA Button
 - Feature Card
 - Industry Card
 - Timeline Step
 - Testimonial Card (future)
 - FAQ Accordion
 - Footer
 - Contact Form
-

What I Need From You for Step 5

Nothing.

Just reply **Next**.

In **Step 5**, we'll create the complete **SEO Specification**. This document will define page titles, meta descriptions, heading hierarchy, URL structure, schema markup, internal linking, image naming, keywords, and performance guidelines so the website is optimized for search engines before any HTML is written.
