

STEP 5 – SEO Specification

Goal

Design the website so search engines clearly understand the business, rank the website for relevant keywords, and attract qualified visitors who are actively looking for AI-powered marketing solutions.

1. SEO Objectives

The website should achieve the following objectives:

- Improve visibility in search engines
 - Attract the right business audience
 - Increase qualified organic traffic
 - Generate more inquiries and leads
 - Build authority in AI-powered marketing
 - Support long-term content marketing
-

2. Target Audience

The website is designed for:

- Small & Medium Businesses
 - Coaching Institutes
 - Restaurants & Cafés
 - Salons & Beauty Clinics
 - Healthcare & Dental Clinics
 - Fitness Centers
 - Retail Stores
 - Home-Based Businesses
 - Fashion Brands
 - Event Management Companies
 - Professional Service Providers
-

3. Primary Keywords

These keywords should naturally appear throughout the website.

Priority	Keyword
----------	---------

High	AI Content Marketing Platform
------	-------------------------------

High	AI Marketing Platform
------	-----------------------

High	AI Business Growth Platform
------	-----------------------------

High	AI Marketing for Small Businesses
------	-----------------------------------

High	AI Content Creation Platform
------	------------------------------

Medium	AI Social Media Content Generator
--------	-----------------------------------

Medium	AI Marketing Strategy
--------	-----------------------

Medium	AI Business Analysis
--------	----------------------

Medium	Marketing Automation Platform
--------	-------------------------------

Medium	Business Growth Platform
--------	--------------------------

4. Secondary Keywords

Use naturally throughout headings and content.

- Professional Marketing Content
- AI Business Analysis
- AI Growth Strategy
- Personalized Marketing Strategy
- Digital Marketing Platform
- Social Media Content
- AI Content Generator
- Customer Engagement
- Content Calendar
- Marketing Automation

- Digital Presence
 - AI Business Insights
 - Lead Generation
 - Brand Growth
-

5. Website URL Structure

The website should have clean, descriptive URLs.

Page	URL
Home	/
Features	/features
Solutions	/solutions
Industries	/industries
How It Works	/how-it-works
About	/about
Contact	/contact

Avoid:

- /page1
 - /index
 - /newpage
 - /services123
-

6. Page Titles

Each page must have a unique SEO title.

Page	SEO Title
Home	AI-Powered Content Marketing Platform for Business Growth Upswing Growth

Page	SEO Title
Features	AI Marketing Features Upswing Growth
Solutions	AI Marketing Solutions for Growing Businesses
Industries	AI Marketing Solutions by Industry
How It Works	How Upswing Growth Works
About	About Upswing Growth
Contact	Contact Upswing Growth

7. Meta Descriptions

Each page should have a concise description (140–160 characters).

Home

Grow your business with AI-powered marketing strategies, personalized content, and platform-specific campaigns designed to attract more customers.

Features

Discover AI-powered business analysis, content creation, marketing strategy, and growth recommendations—all in one platform.

Solutions

Explore personalized AI marketing solutions for coaching institutes, restaurants, salons, healthcare, retail, and more.

About

Contact

Connect with the Upswing Growth team and discover how AI-powered marketing can help grow your business.

8. Heading Structure

Maintain a logical heading hierarchy.

Example:

H1

H2

H3

H3

H2

H3

H2

Rules:

- Only one H1 per page
- Use H2 for major sections
- Use H3 for subsections
- Do not skip heading levels

9. Internal Linking Strategy

Connect pages naturally.

Examples:

- Home → Features
- Home → Solutions
- Features → How It Works
- Solutions → Industries
- Industries → Contact
- About → Contact
- Footer → All Pages

10. Image SEO

Image names should describe the content.

Good Examples

ai-marketing-dashboard.webp

business-growth-platform.webp

content-calendar.webp

restaurant-marketing.webp

coaching-marketing.webp

Avoid

image1.jpg

banner.png

photo2.jpg

final.webp

Every image must include meaningful alt text.

Example

AI dashboard showing personalized marketing recommendations

11. Structured Data (Schema Markup)

Implement structured data to improve search engine understanding.

Include:

- Organization
 - Website
 - SoftwareApplication
 - FAQPage
 - BreadcrumbList
 - ContactPage
-

12. Open Graph Tags

Every page should define:

- Title
- Description
- URL
- Preview Image
- Site Name

This improves sharing on LinkedIn, Facebook, WhatsApp, and X.

13. Performance Optimization

Target metrics:

Metric	Goal
Lighthouse Performance	95+
SEO Score	100
Accessibility	100
Best Practices	100
Largest Contentful Paint	Under 2.5 sec
First Contentful Paint	Under 1.8 sec
Cumulative Layout Shift	Under 0.1

14. Technical SEO Checklist

The website should include:

- Semantic HTML5
- Mobile-first responsive design
- Canonical URLs
- XML Sitemap
- robots.txt
- HTTPS
- Optimized image loading

- Lazy loading
 - Minified CSS
 - Minified JavaScript
 - Browser caching
 - Fast loading assets
-

15. Content Optimization Guidelines

Follow these best practices:

- Write naturally for users first.
 - Include keywords naturally without overusing them.
 - Keep paragraphs short and readable.
 - Use descriptive headings.
 - Add clear calls to action.
 - Answer common customer questions.
 - Focus on business value rather than technical jargon.
-

16. Future Content Strategy

To improve long-term SEO, publish articles such as:

- How AI Can Improve Small Business Marketing
- AI Marketing for Coaching Institutes
- AI Marketing for Restaurants
- AI Marketing for Salons
- AI Marketing for Healthcare Clinics
- Social Media Marketing Best Practices
- AI Business Growth Strategies
- Content Marketing Tips for Small Businesses
- Marketing Automation for Local Businesses
- Building a Strong Digital Presence with AI

17. Final SEO Checklist

Before launching the website, verify:

- ☐ Unique page titles
- ☐ Meta descriptions added
- ☐ One H1 per page
- ☐ Correct heading hierarchy
- ☐ Optimized image names
- ☐ Alt text for all images
- ☐ Internal links working
- ☐ XML sitemap generated
- ☐ robots.txt created
- ☐ Canonical URLs configured
- ☐ Open Graph tags added
- ☐ Structured data implemented
- ☐ Mobile-friendly design
- ☐ Fast page loading
- ☐ HTTPS enabled
- ☐ No broken links
